Gartner Security & Risk Management Summit

June 3 – 5, 2024 | National Harbor, MD
gartner.com/us/securityrisk

Gartner

New for 2024

Introducing Solution Villages. To elevate the on-site experience and encourage meaningful interactions between exhibitors and attendees, Gartner Conferences is introducing **Solution Villages.** Exhibitors will be strategically placed within the Village that best aligns to their product offering. This will help both our attendees and exhibitors get the most value out of the showfloor and will allow for intentional, high-quality conversations that ultimately drive leads.

Villages Include:

Application Security: Explore the tools that will help you to secure increasingly modular, composable and diversely sourced applications.

Cloud Security: Cloud security remains a top priority for many organizations. Explore the latest SaaS, PaaS and IaaS security solutions and learn what they can deliver for your organization.

Data Security: Assess the data security technologies that will enable you discover, classify and protect sensitive data throughout its life cycle — both on-premises and in the cloud.

Identity & Access Management: The importance of digital identity continues to grow, as organizations strive to protect their environments. Explore the latest solutions that will solve your IAM challenges.

Risk, Resilience & Compliance Management: Investigate the cyber risk management technologies and services that can help you to uncover the impacts of cyber risk and support your business and compliance goals.

Security Strategy, Management and Governance: Explore the solutions and services to ensure you have a complete, cost-effective security strategy and to advance your security awareness efforts.

Threat Intelligence and Vulnerability Management: Examine the latest solutions to help your organization understand its vulnerabilities, prepare for your own unique threat landscape and bolster your prevention and prediction capabilities.

Security Operations & Analytics: Security operations is a crucial component of an effective security program. Learn how to increase business resilience through effective threat and exposure visibility, response planning, analytics and risk prioritization.

Infrastructure, Network and Endpoint Security: Delve into the evolving landscape of infrastructure security solutions, from managed and unmanaged endpoints to the rapidly evolving network requirements to support cloud workloads and remote workspaces.

Startup Village: Explore the forefront of cybersecurity at our Startup Village. Discover innovative solutions from emerging startups, offering the latest in threat detection, AI Security, and more.

| For more details and to become an exhibitor, email exhibit@gartner.com.
